PROFILE

Results-driven Backend Software Engineer with 2+ years of experience in developing scalable APIs and web applications using Python, Django, PHP, and REST frameworks. Adept at collaborating with frontend/UI teams to deliver interactive, user-friendly solutions. Recognized for fast-paced learning, delivering projects under tight deadlines, and improving backend performance. Skilled in teaching Python and mentoring teams.

SKILLS

Backend: RESTful APIs, Django REST Framework, PHP, Flask

Frontend: Basic HTML, CSS, JavaScript, Bootstrap, Tailwind

Tools: GitHub, Linux, PostgreSQL, SQLite, VSCode, Vim

Soft Skills: Team Leadership, Collaboration, Adaptability, Problem-Solving

PROFESSIONAL EXPERIENCE

Junior Programmer(Harvard Online), *Harvard University* 2023 – present

- Completed multiple real-world projects using Python, Flask, and SQL, deploying them on GitHub.
- Collaborated with peers to troubleshoot bugs and improve project quality via the CS50 Discord community.
- Gained hands-on experience in Linux command-line operations and bug fixing for compatibility.

Backend Developer, *Digital Fortress Inst.* 05/2024 – 12/2024

- Led the backend team in developing a Django REST API for a travel website under tight deadlines.
- Collaborated closely with UI/UX and frontend teams to deliver a seamless and interactive user experience.

Programming Instructor, *Digital Fortress Inst.* 05/2024 – present

- Taught Python to 50+ students across beginner to intermediate levels, enhancing their coding proficiency.
- Led the "Summer Code with Kids" initiative, mentoring teenagers in coding fundamentals.
- Guided students in hands-on projects, offering assistance in problem-solving and project development.

PROJECTS

ShopSphere Demo (Ongoing) 

- Contributing to an open-source demo project by integrating backend features to improve functionality.
- Collaborating with maintainers to enhance multi-language support and project documentation.
- Leveraging technologies like **Flask-Babel**, and version control via **GitHub**.

Travel API Website 

- Contributed using **Django REST Framework**, ensuring scalability and optimized performance.
- Resolved **Git merge conflicts** during team collaborations, maintaining a clean version history and ensuring smooth development workflows.

Harvard CS50 Projects 

- **E-commerce Auction:** A Django auction platform where users can create, bid, and close auctions.
- **Mail Client (Frontend):** Built a front-end application using **JavaScript** to send and receive emails via API calls.
- **Stock Market Management Tool:** A financial management system enabling stock trading, transaction tracking, and cash balance management using **Flask** and **SQL**.

EDUCATION

BSc Computer Science, *University of the People*

Current CGPA: 3.62/4.0

05/2023 – 2026 | Pasadena, USA
